

1. Honey production in Ukraine

The production and export of honey, thousand Tons

By the end of 2012, Ukraine came out on top in the world in volumes of production of honey per capita. Today, Ukraine is surely among the world's five largest producers and exporters of honey.

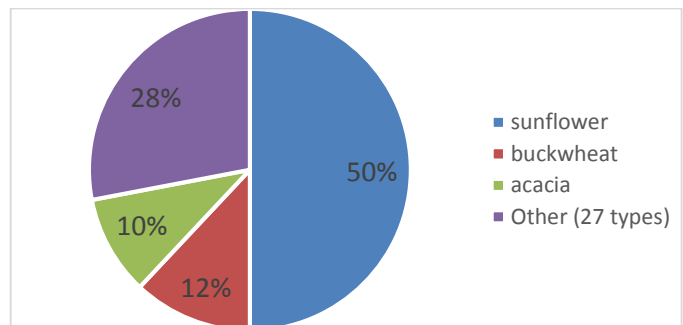

2. The structure of honey exports in 2014

The main importers of Ukrainian honey are the European Union countries (primarily Germany and Poland) and the United States, which confirms the high quality of Ukrainian honey and its potential in the global market.

3. Composition types of honey in Ukraine

Ukraine produces about 30 different types of honey.
 The main volume - sunflower and motley grass due to the structure of crops.
 Ukraine also produces a large volume and variety of Mono flora honeys, the main of which are acacia, buckwheat, linden.
 Ukrainian Poly flora honey (motley grass) - today one of the best in the world.

4. Advantages and possibilities of Ukraine as a producer of honey

The potential of honey production in Ukraine is 100-150 thousand Tons of high quality honey per year.

Factors which will contribute to an increase of honey production in Ukraine:

- Priority role of the agricultural sector as one of the engines of the Ukrainian economy
- Awareness of the need to develop private enterprise (the main sector of the honey production) and supportive government policy for this.
- The presence of a huge potential to increase the collection of honey through the implementation of advanced technologies in this field.

Factors which allow Ukraine to be a leading global supplier of high-quality honey:

- Moderate climate and its changes.
- The relatively large square is not cultivated area
- Growth of oilseeds areas in Ukraine, from which produced the popular type of honey - sunflower.
- Judicious use of fertilizer and phytosanitary product by farmers, which minimizes the amount of harmful impurities in honey. In addition, this factor contributes to the increase of number of bee colonies in Ukraine.
- The course on European integration, which encourages entrepreneurs and manufacturers to implement advanced manufacturing practices and quality systems.

«AMK» Ltd on the Ukrainian market

In 2014 the company “AMK” Ltd started the business organization on the harvesting, processing and export of honey. We organize business that will include a full production cycle:

- collecting honey from its own or partner apiaries (50% of total);
- Industrial preparation of honey for wholesale;
- packing honey.

At the end of 2014, we are able to offer for realization 100 tons of honey, harvest 2014

In 2015 marketing year, we plan to procure not less than one thousand tons of honey in types: motley grass, sunflower, and other mono flora types.

We adhere to the principles of customer focus and innovation for our partners and customers. We giving an opportunity to see more and choose the best.

We aim for a long-term mutual benefits

Approach to quality

Similarly to our existing manufacturing process, we create process of honey production in compliance with the highest standards of quality and food safety.

We organize our process in such way to ensure the collection, procurement and manufacturing only of the highest quality honey. At all key stages (collection, procurement and production) we provide laboratory quality control of honey by the following parameters:

- humidity;
- The level of hydroxymethylfurfural and diastase;
- acidity;
- check for fermentation;
- Identification of possible falsification of honey;
- the presence of residual impurities antibiotics and other chemicals.

The procedures implemented in the "AMK"
